M1000 2 PIECE REEL ROD STUDS

Broken reel rod stud?
No time to pull cylinder to fix?
Need to be back in production quickly?
AIR STAMPING HAS A SOLUTION!

ASI has designed a 2 piece reel rod stud(2PS) that should be in every maintenance or pressroom manager's drawer. The 2PS allows the press to get back into production quickly, without having to pull the cylinder to replace the broken stud. This stud is offered for both the ASI and Goss plate and blanket stud designs. The 2PS is not designed as a permanent fix. We recommend replacing when the schedule allows with the original 1 piece stud..
